

# Automatic filling machine BIB 900

A new concept to fill liquid products  
(wine, milk, liquid eggs, oil)  
in web bags from 3L to 20L.

Possibility to have a twin head  
to increase the production.

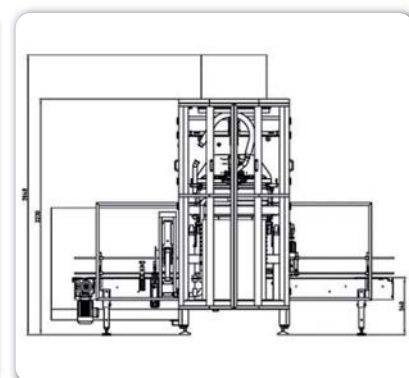

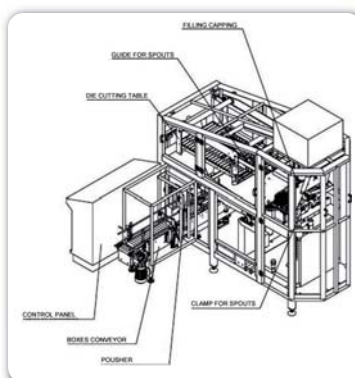

# Automatic filling machine BIB 900

Technical characteristics	BIB 900 single head
Electric supply	3x380 V + N + earth connection
Electric power	3,6 KW
Pneumatic consumption	70 m <sup>3</sup> /H
Weight of the machine	around 2000 Kgs
External dimensions (LxWxH in mm)	3222 x 3096 x 2648

Security : conformity with EC regulations

## The innovations

- Driving jack with a double pusher to increase production output.
- Easy access without any risk to the filling chamber.
- New generation of filling head and new clamp for spouts which allows to fill bags with short and standard Vitops® taps and other caps.
- Driving controls panel of the filling machine displayed on a console desk.
- Separation between the vacuum circuit and the nitrogen circuit with allows a better filling and a better preservation of the products.

Cadences for feeding of incoming product of 10000 L/H for a single head

Volume	>3L	>5L	>10L	>15L	>20L
BIB 900 single head	900 BIB/H	735 BIB/H	503 BIB/H	383 BIB/H	309 BIB/H
